Experience:

2+ Years: **HTML, CSS, JavaScript, React, Tailwind CSS, Figma, Vite**

About:

Hi! I'm Alexis, a passionate Front-End Web Developer and UI/UX enthusiast specialized in building modern dynamic pixel-perfect websites. I really love creating things and every last attention to detail matters to me.

Webflix: (<https://webflix-luna.vercel.app>)

- Movie API-based project able to fetch data for movies including runtime, rating, overview, cast and similar movies, as well as actor data like filmography, place and date of birth and more!
- Responsive layout created with React and Tailwind CSS alongside a dynamic search bar for any user's query including suggestions and results for movies and actors.

Comet Weather: (<https://nero1889.github.io/Project-4---Comet-Weather/>)

- Weather app that fetches data from an API from any city based on your query
- Search bar with suggestions, and results shown in an instant
- Returns data like temperature, a 5-day forecast air quality index, hourly weather, and much more!

Neat Fades Barbershop: (<https://neat-fades-barbershop.vercel.app>)

- Modern website using HTML, Tailwind CSS and JavaScript, fully responsive!
